Minimize Learning Curve: Most Windows developers already know ActiveX technology. With SOG, they can use industry's leading tools to build desktop-based or web-based client application to access Pathway application without having to learn any details of the NonStop Server environment

Simplify Development: SOG insulates client developers from the complexities of the transaction processing server. There are no complex application program interfaces (APIs) to learn. SOG also allows you to manage your TMF transaction from the client or web server, and ensures total transaction integrity.

Easy to Deploy: SOG makes it easy for you to deploy your client/server application. All you need to do is make them available to your desktop client or web pages to access Pathway services. No complex installation or inclusion of API libraries needed.

Key Features

- ☐ Access Pathway Services as ActiveX objects. No complex API to learn.
- ☐ Support for popular desktop tools. Microsoft Visual Basic, Visual C++, C# technology
- ☐ Works with Microsoft IIS and Active Server Pages (ASP) VBScript JavaScript
- ☐ Graphical User Interface (GUI) Administrative Interface uses drag and drop to manage objects
- ☐ Manage TMF transaction control from desktop client or IIS Active Server Page
- ☐ High performance and scalable

About TIC Software

TIC Software is a leading technology product development and consulting services company. TIC draws from a rich NonStop heritage, while focusing simultaneously on future proofing solutions for our customers.

Committed to always putting the customer first, TIC acts as a trusted advisor in providing best of class products - secured through privileged partnerships and/or developed in house - as well as curated support, training, and strategic planning.

TIC continues to believe that community and education are the building blocks of the NonStop community and distinguishes itself by incorporating these tenets into each and every business approach.
